

Marco Carreira

Front-End Developer

PROFESSIONAL SUMMARY

With a solid foundation in web development principles, I excel in problem-solving and creative thinking. My background as a technician, especially in the electrical field with its focus on fault finding has helped me in my shift to Information Technology, the skill of fault finding is very useful when it comes to coding errors. I'm enthusiastic about learning and I adapt quickly. My time at Total Energies taught me many skills such as how to collaborate closely with other departments and customers.

- Identified hazards, defects, or repairs required through electrical testing.

MY PROJECTS

This is a **Personal Portfolio Website** design I made using HTML CSS and JavaScript. In this website design I will add the name & designation of the user. Then I will display the image, skills, work experience and education details. I will also add the list of services and work portfolio on this website. In the footer of this website we will add contact info and contact form. You can receive the contact form data on your google sheets. This website design will be completely responsive for all screen devices like mobile phones.

Please have a look at the Portfolio Website, here is the link–
<https://marcovcarreira.github.io/Portfolio-Website/>

This is a **Weather App** for a Website using HTML CSS and JavaScript. We will get the current weather data from the Fess API key from OpenWeatherMap and display the weather information like Temperature, Weather condition, Humidity and Wind Speed according to the city on our website or app. We will display the weather info on the website from Free API using JavaScript. In this weather app I have added one search box where the user can enter the city name and get the weather information of the city.

Please have a look at the App here is the link –
